IMPROVING INDOOR AIR QUALITY THROUGH BETTER VENTILATION

Fantech's new  
**BUILDERS'**  
**OPTIONS**

For more than 20 years,  
Fantech has been providing  
superior Ventilation Solutions  
for builders like you.

Now we're introducing a  
new concept in home  
ventilation that could  
increase your sales while  
improving your profits.

**In today's competitive home building  
market, business as usual  
just isn't good enough.**

It's time to try a new approach  
that gives you a competitive edge.

Fantech introduces Builders' Options  
Ventilation Solutions.

It's a simple concept that provides  
better ventilation in the homes you build  
while saving time and money.

One simple rough-in layout –  
two great options.

# BUILDERS' OPTION ONE

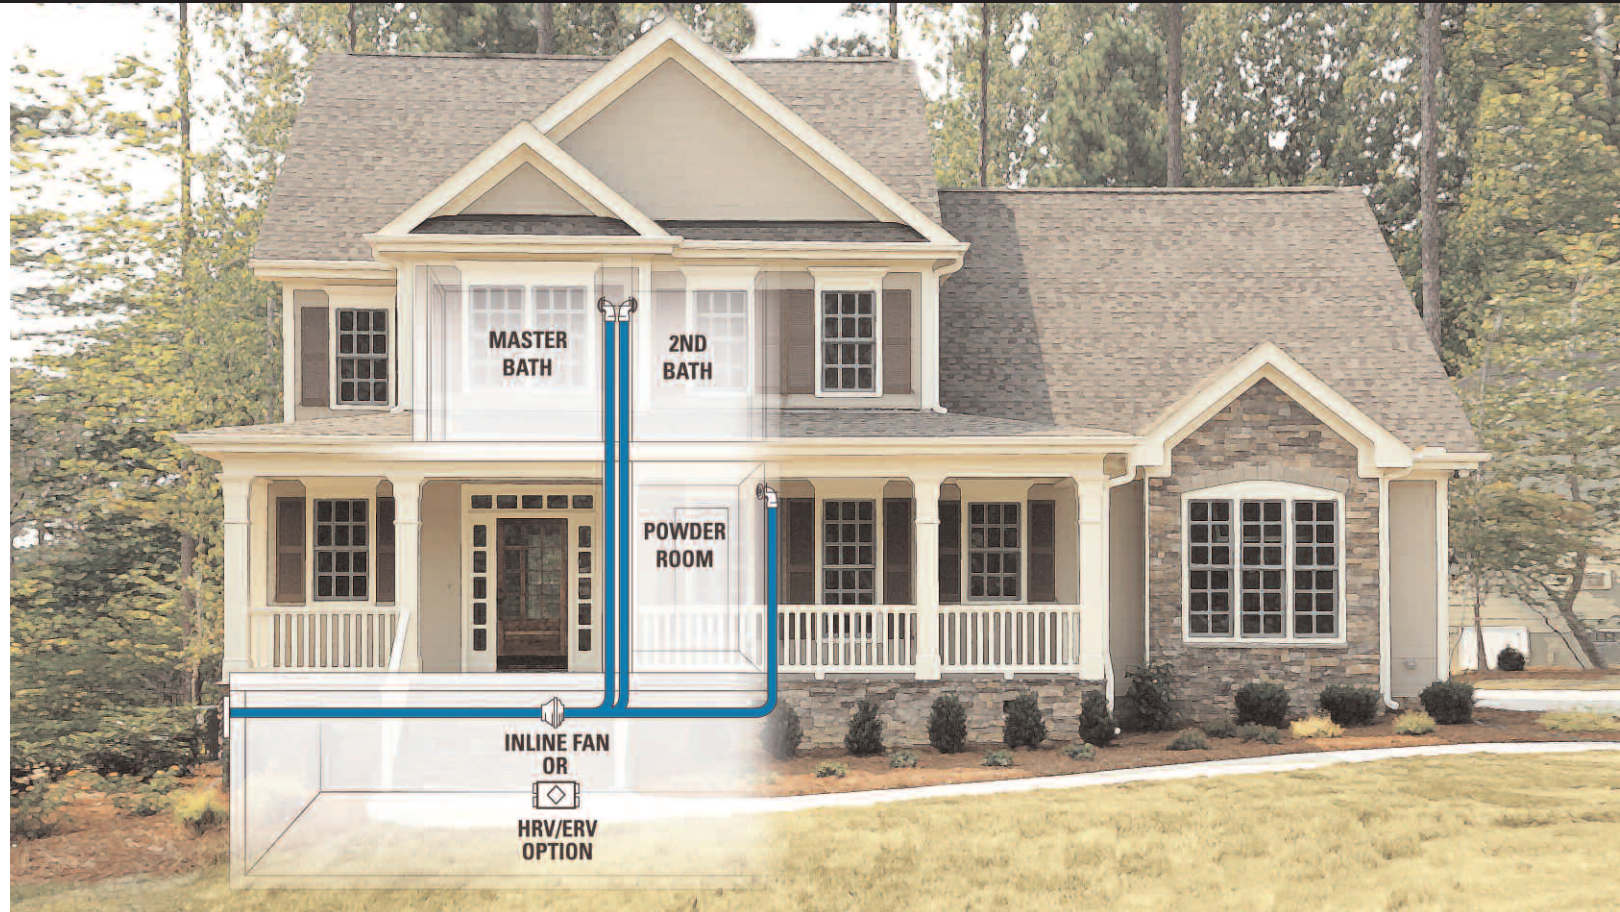

OPTION ONE starts with a simple rough-in layout and a single Fantech Energy Star Rated Inline Bath Fan mounted in the basement.

The fan is ducted up through a wall cavity to multiple bathrooms or powder rooms to provide quiet, energy-efficient ventilation. Small grilles are installed in the side walls so no ceiling penetrations are needed. Fan exhausts through a standard wall cap mounted slightly above the foundation so roof penetrations are eliminated.

Add our new Ventech Controls and the fan can be programmed to provide continuous and/or intermittent ventilation to meet the requirements of ASHRAE Standard 62.2.

# BUILDERS' OPTION TWO

OPTION TWO is the perfect choice for the discriminating home buyer who wants a completely balanced whole-house ventilation system that saves energy and improves indoor air quality.

A Fantech Heat or Energy Recovery Ventilator is the key component in Option Two.

Installation is fast and easy using the same rough-in layout as Option One. Simply add an additional duct connection from the HRV/ERV to the furnace and one for fresh air intake.

Easy-to-operate wall controls put homeowners in full control of their home environment with just the touch of a button.

NO MATTER WHICH OPTION YOU CHOOSE,  
IT ADDS UP TO IMPROVED VENTILATION AND IMPROVED PROFITS.

### **Inline Exhaust Fans**

Fantech FG series inline fans give your home buyers something they really want ... quiet, energy efficient bathroom ventilation. And with these fans you won't have any call backs. They're designed for dependable, problem-free operation year after year.

### **Ventech Controls**

Fantech's new patent-pending Ventech Programmable Controls are designed to turn the exhaust fan into a continuous or intermittent low level ventilation system for the entire home. 20 minute boost feature brings fan to full speed with a touch of a button.

### **Accessories**

Fantech stocks all the accessories you need to complete your installation. 90° elbows, grilles and duct accessories like wye-adapters and wall caps.

### **Heat Recovery Ventilator Energy Recovery Ventilator**

Energy-conscious home buyers are sure to appreciate the improved indoor air quality they'll get with a Fantech HRV or ERV installed in the home. It's a truly balanced ventilation system that results in energy savings that really add up.

### **HRV/ERV Controls**

Fantech provides a wide range of convenient wall controls for use with our Heat or Energy Recovery Ventilators. Choose from multi-function controls, dehumidistats or boost timers.
